

THE BERKSHIRE FUNDS
2010 SEMI-ANNUAL REPORT

This report is provided for the general information of the Berkshire Funds shareholders. It is not authorized for distribution unless preceded or accompanied by an effective Prospectus, which contains more complete information about the Berkshire Funds. Please read it carefully before you invest.

In recent years, returns have sustained significant gains and losses due to market volatility in the technology sector. Due to market volatility, current performance may be lower than the figures shown. Call 1-877-526-0707 or visit berkshirefunds.com for more current performance information. Past performance is no guarantee of future results and investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Total return includes reinvestment of dividends and capital gain distributions.

The Dow Jones Industrial Average is a measurement of general market price movement for 30 widely-held stocks primarily listed on the New York Stock Exchange. The S&P 500® Index is a registered trademark of Standard & Poor's Corporation and is a market-weighted index of common stock prices for 500 large U.S. companies. The Nasdaq Composite Index is a capitalization-weighted index of over 5,000 common stocks listed on the Nasdaq Stock Market. Each index represents an unmanaged, broad-based basket of stocks. These indices are typically used as benchmarks for overall market performance.

Portfolio composition is subject to change at any time and references to specific securities, industries and sectors are not recommendations to purchase or sell any particular security.

PERFORMANCE AND PORTFOLIO DISCUSSION
6/30/2010

LETTER TO THE SHAREHOLDERS

Dear Fellow Shareholders,

For the six month period ended June 30, 2010, the Berkshire Focus Fund outperformed its primary benchmark index. The Berkshire Focus Fund generated a total return of +2.08% while the S&P 500® Index – which we consider to be the Fund's primary benchmark index – had a total return of –6.65% over the same period. For comparative purposes, the Dow Jones Industrial Average posted a return of –5.00% and the Nasdaq Composite Index generated a return of –6.62% for the period ended June 30, 2010.

Please see the Fund Overview section and the accompanying financial statements for more detailed information about the Fund's longer-term performance. All return data includes reinvested dividends but do not reflect the impact of taxes.

Stock markets stumbled out of the gate in early 2010 as investors who were unable to shake-off persistent worries about the sustainability of U.S. economic growth, decided to lock in their strong gains from the previous year. Labor markets were anemic and the U.S. unemployment rate remained stubbornly weak at 9.7% through the end of March. The housing market continued to sputter, despite government incentives for homebuyers, and the fading effects of government stimulus coupled with large U.S. fiscal deficits – all remained key concerns for investors. However, despite investor angst, the broad-market equity indices staged a strong rally that lasted into the end of the quarter. The rally was buoyed in large part by better-than-expected corporate earnings reports which showed a tremendous recovery in earnings; a direct result of U.S. corporations focus on tight cost controls instead of increased spending and hiring. Also fueling the stock market's advance was an expansion of U.S. gross domestic product, the value of all goods and services produced, which grew at an annualized rate of 3.7% from January to March.

Early in the second quarter, equity markets resumed their upward trajectory driven by robust corporate earnings reports and investors increased appetite for risk. The end of April however, marked the cyclical peak of the markets as economic growth expectations were downgraded and worries about a “double-dip” recession were re-kindled. Negative investor sentiment was further aggravated by a maelstrom of other developments – including a “flash crash” in the U.S. equity markets, a major oil spill in the Gulf of Mexico, reduced stimulus and monetary tightening in China, regulatory reform of the financial services industry, reduced sovereign creditworthiness in Europe, Goldman Sachs coming under fire from the SEC, the specter of higher taxes as the Bush tax cuts expire – all proved too much for the stock markets to overcome. Not surprisingly, investors faced with a seemingly endless stream of negative events, finally succumbed to a crisis of confidence igniting several broad market sell-offs that would last until the end of the quarter.

The Fund advanced against this backdrop led by strong gains in some of our largest investments – Apple (AAPL), Salesforce.com (CRM), Baidu (BIDU) and Netflix (NFLX). Other contributors to the Fund's outperformance during the period were Chipotle Mexican Grill (CMG), F5 Networks (FFIV) and VMware (VMW). Meanwhile, our investments in Priceline.com (PCLN), Google (GOOG) and Goldman Sachs (GS) temporarily worked against us. Some new additions to the portfolio during the second half of the year included Acme Packet (APKT), Akamai Technologies (AKAM), Cirrus Logic (CRUS) and Citigroup (C).

As always, we thank you for your confidence and continued investment in the Berkshire Funds.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2010 (UNAUDITED)

1. Organization

The Berkshire Focus Fund (the “Fund”) is a non-diversified series of The Berkshire Funds (the “Trust”), an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Trust was organized as a Delaware business trust on November 25, 1996. The Fund commenced operations on July 1, 1997. The Fund’s investment objective is to seek long-term capital appreciation through investments in equity securities.

2. Significant Accounting Policies

The following is a summary of the Trust’s significant accounting policies:

Securities valuation — The Fund’s portfolio securities are valued as of the close of the regular session of trading on the New York Stock Exchange (the “NYSE”), normally 4:00 p.m., Eastern time. Securities which are traded on stock exchanges or are quoted by Nasdaq are valued at the last reported sale price as of the close of the regular session of trading on the NYSE, or, if not traded, at the most recent bid price. Securities which are traded in the over-the-counter market, and which are not quoted by Nasdaq, are valued at the most recent bid price, as obtained from one or more of the major market makers for such securities. Securities for which market quotations are not readily available are valued at their fair value as determined in good faith in accordance with consistently applied procedures established by and under the general supervision of the Board of Trustees.

In accordance with U.S. generally accepted accounting principles (“GAAP”), fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. GAAP establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Fund’s investments. The inputs are summarized in the three broad levels listed below:

Level 1 – quoted prices in active markets for identical investments.

Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2010 (UNAUDITED)

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of June 30, 2010:

<i>Cash Equivalent</i>	26,452	-	-	26,452
Total Investments	\$ 15,788,630	-	-	\$ 15,788,630

In January 2010, FASB issued Accounting Standards Update No. 2010-06, Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 requires new disclosures regarding transfers in and out of Levels 1 and 2 (effective for interim and annual periods beginning after December 15, 2009), as well as additional details regarding Level 3 transaction activity (effective for interim and annual periods beginning after December 15, 2010). There were no significant transfers into or out of Level 1 and Level 2 fair value measurements during the reporting period, as compared to their classification from the most recent annual report.

Subsequent events evaluation — In preparing these financial statements, the Fund has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued and noted no items requiring adjustment of the financial statements or additional disclosures.

Investment income — Dividend income is recorded on the ex-dividend date. Interest income is accrued as earned.

Distributions to shareholders — Distributions to shareholders arising from net investment income and net realized capital gains, if any, are distributed at least once each year. Distributions to shareholders are recorded on the ex-dividend date. Dividends from net investment income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Security transactions — Security transactions are accounted for on the trade date. Securities sold are determined on a specific identification basis.

Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2010 (UNAUDITED)

Federal income tax — The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code (the “Code”) necessary to qualify as a regulated investment company. As provided therein, in any fiscal year in which the Fund so qualifies and distributes at least 90% of its taxable net income, the Fund (but not the shareholders) will be relieved of federal income tax on the income distributed. Accordingly, no provision for income taxes has been made.

As of and during the year ended December 31, 2009 the Fund did not have a liability for any unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense on the statement of operations. During the year, the Fund did not incur any interest or penalties. The Fund is not subject to examination by U.S. federal tax authorities for tax years before 2006.

In order to avoid imposition of the excise tax applicable to regulated investment companies, it is also the Fund’s intention to declare as dividends in each calendar year at least 98% of its net investment income and 98% of its net realized capital gains plus undistributed amounts from prior years.

Other — The treatment for financial reporting purposes of distributions made to shareholders during the year from net investment income or net realized capital gains may differ from their ultimate treatment for federal income tax purposes. These differences are caused primarily by differences in the timing of the recognition of certain components of income, expense or realized capital gain for federal income tax purposes. Where such differences are permanent in nature, they are reclassified in the components of the net assets based on their ultimate characterization for federal income tax purposes. Any such reclassifications will have no effect on net assets, results of operations or net asset value per share of the Fund.

3. Investment Transactions

Purchases and sales of investment securities (excluding short-term instruments) for the six months ended June 30, 2010 were \$72,799,961 and \$76,210,806, respectively. There were no purchases or sales of U.S. Government securities for the Fund.

4. Tax Information

As of December 31, 2009, the components of accumulated earnings (deficit) on a tax basis were as follows:

Federal income tax cost	\$	18,118,261
Gross unrealized appreciation	\$	915,384
Gross unrealized depreciation		(179,719)
Net unrealized appreciation		735,665
Undistributed ordinary income		0
Accumulated losses		(73,349,129)
Total accumulated losses	\$	(72,613,464)

The cost basis of investments for tax and financial reporting purposes differs primarily due to the deferral of capital losses from wash sales.

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2010 (UNAUDITED)

There were no distributions paid during the six months ended June 30, 2010 or the year ended December 31, 2009.

At December 31, 2009, the Fund had the following capital loss carryforwards for tax purposes:

<u>Capital Loss Carryforward</u>	<u>Date of Expiration</u>
\$ 5,953,640	12/31/16
\$ 542,380	12/31/12
\$ 10,452,456	12/31/11
\$ 56,400,653	12/31/10

To the extent these loss carryforwards are used to offset future capital gains, it is probable that the amount, which is offset, will not be distributed to shareholders.

5. Related Party Transactions, Investment Advisory and Administrative Fees

Certain Officers and Trustees of the Trust are also Officers and Directors of Berkshire Capital Holdings, Inc. ("Berkshire Capital"). The non-interested Trustees of the Fund were not paid any Trustee fees and expenses directly by Berkshire Capital during the six months ended June 30, 2010.

The Fund has an Investment Advisory Agreement (the "Advisory Agreement") and a separate Administration Agreement with Berkshire Capital. Under the Advisory Agreement, Berkshire Capital will determine what securities will be purchased, retained or sold by the Fund on the basis of a continuous review of the portfolio. For the services it provides under the Advisory Agreement, Berkshire Capital receives a fee accrued each calendar day (including weekends and holidays) at a rate of 1.50% per annum of the daily net assets of the Fund. Under the Administration Agreement, Berkshire Capital renders all administrative and supervisory services of the Fund, as well as facilities furnished and expenses assumed. For these services, Berkshire Capital receives a fee at the annual rate of 0.50% of the Fund's average daily net assets up to \$50 million, 0.45% of average net assets from \$50 million to \$200 million, 0.40% of average net assets from \$200 million to \$500 million, 0.35% of average net assets from \$500 million to \$1 billion and 0.30% of average net assets in excess of \$1 billion. Such fee is computed as a percentage of the Fund's daily net assets and is accrued each calendar day (including weekends and holidays). For the six months ended June 30, 2010, Berkshire Capital was paid an investment advisory fee of \$127,858 and an administration fee of \$42,605 from the Fund. The amount due to Berkshire Capital for these fees at June 30, 2010 totaled \$27,853.

6. Redemption Fee

On October 12, 2006 the Board of Trustees unanimously approved a redemption fee of 2.00% on shares held for 90 days or less, to become effective January 1, 2008, or thereafter as reasonably practical. For the six months ended June 30, 2010 proceeds from redemption fees were \$6,719.

7. Beneficial Ownership

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a fund creates a presumption of control of the fund, under Section 2(a)(9) of the Investment Company Act of 1940. At June 30, 2010, Charles Schwab & Co. owned 30.67% of the Fund.

EXPENSE EXAMPLE

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory fees, administrative fees and interest expense. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested in the Fund on January 1, 2010 and held through June 30, 2010.

Actual Expenses

The first line of the table on the following page provides information about actual account values and actual expenses. Although the Fund charges no sales load or transaction fees, you will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by Mutual Shareholder Services, LLC, the Fund's transfer agent. If you request that a redemption be made by wire transfer, currently a \$20.00 fee is charged by the Fund's transfer agent. IRA accounts will be charged an \$8.00 annual maintenance fee. To the extent the Fund invests in shares of other investment companies as part of its investment strategy, you will indirectly bear your proportionate share of any fees and expenses charged by the underlying funds in which the Fund invests in addition to the expenses of the Fund. Actual expenses of the underlying funds are expected to vary among the various underlying funds. These expenses are not included in the example. The example includes advisory fees, administrative fees and interest expense. However, the example does not include portfolio trading commissions and related expenses and other extraordinary expenses as determined under generally accepted accounting principles. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5%

hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value <u>January 1, 2010</u>	Ending Account Value <u>June 30, 2010</u>	Expenses Paid During the Period* January 1, 2010 to <u>June 30, 2010</u>
Actual	\$1,000.00	\$1,020.80	\$10.07
Hypothetical (5% annual return before expenses)	\$1,000.00	\$1,014.83	\$10.04

*Expenses are equal to the Fund's annualized expense ratio of 2.01%, multiplied by the average account value over the period, multiplied by 181/365 to reflect the one-half year period.
