BERKSHIRE FOCUS FUND (BFOCX)

This report is provided for the general information of the Berkshire Funds shareholders. It is not authorized for distribution unless preceded or accompanied by an effective Prospectus, which contains more complete information about the Berkshire Funds. Please read it carefully before you invest.

In recent years, returns have sustained significant gains and losses due to market volatility in the technology sector. Due to market volatility, current performance may be lower than the figures shown. Call 1-877-526-0707 or visit berkshirefunds.com for more current performance information. Past performance is no guarantee of future results and investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Total return includes reinvestment of dividends and capital gain distributions.

The Dow Jones Industrial Average is a measurement of general market price movement for 30 widely-held stocks primarily listed on the New York Stock Exchange. The S&P 500® Index is a registered trademark of Standard & Poor's Corporation and is a market-weighted index of common stock prices for 500 large U.S. companies. The Nasdaq Composite Index is a capitalization-weighted index of over 5,000 common stocks listed on the Nasdaq Stock Market. Each index represents an unmanaged, broad-based basket of stocks. These indices are typically used as benchmarks for overall market performance.

Portfolio composition is subject to change at any time and references to specific securities, industries and sectors are not recommendations to purchase or sell any particular security.

LETTER TO THE SHAREHOLDERS

Dear Fellow Shareholders,

For the six-month period ended June 30, 2013, the Berkshire Focus Fund underperformed its primary benchmark index. The Fund generated a total return of +5.55% while the S&P 500® Index – which we consider to be the Fund’s primary benchmark index – had a total return of +13.82% over the same period. For comparative purposes, the Dow Jones Industrial Average posted a return of +15.20% and the Nasdaq Composite Index generated a return of +13.42% during the first half of the year. Please see the Fund Overview section and the accompanying financial statements for more detailed information about the Fund’s longer-term performance. All return data includes reinvested dividends but do not reflect the impact of taxes.

In the first quarter of 2013, U.S. equity markets were able to surmount concerns over the impending “fiscal cliff” and “budget sequestration,” when automatic federal government spending cuts began on March 1, at the same time that significant tax increases went into effect at year-end 2012. However, those negative forces were counterbalanced by massive liquidity injections by the Federal Reserve and European Central Bank through their highly accommodative stimulus programs. In addition, the U.S. gross domestic product (“GDP”), the broadest measure of goods and services produced in the economy, grew at a 1.8% rate between January and March. As the quarter progressed, investor sentiment turned increasingly positive on the prevailing belief that growth momentum in the U.S. economy and the housing markets would return by the second half of 2013. Against this backdrop, stock markets posted robust gains for the period and the Dow Jones Industrial Average established new all-time highs.

U.S. equity markets extended their rally at the beginning of the second quarter, albeit with considerable intra-period volatility. Contributing to stock market uncertainty was an amalgam of developments at the start of the period – including tepid U.S. economic data, slowing growth in China, saber-rattling by North Korea, a terrorist bombing at the Boston Marathon and a collapse in the price of gold. Investors shook-off these chronic concerns in May however, as the momentum continued with stocks adding upon their already impressive year-to-date gains. More notably, during the month the S&P 500 Index® joined the Dow Jones Industrial Average in establishing new record all-time highs. Also underpinning this positive trend was the improvement reflected in the GDP, which grew at an 2.5% annualized rate in the second quarter. At the Federal Reserve’s two-day meeting in June however, Chairman Ben Bernanke caught the equity markets off-guard by indicating the Fed could begin “tapering” its stimulus programs before the end of the year. Almost immediately, interest rates began to spike around the world and the mere mention of tapering roiled the U.S. equity markets. Not surprisingly, stocks reacted negatively to the news by falling across-the-board. Despite investor angst, the major U.S. equity markets rebounded at the end of June to finish the first half of the year with strong positive gains.

Looking at the portfolio, among the Fund’s biggest percentage gainers year-to-date were LinkedIn (LNKD), Netflix (NFLX), Priceline.com (PCLN) and Tesla Motors (TSLA). Other contributors to the Fund were Google (GOOG), NetSuite (N), Workday (WDAY) and Yahoo! (YHOO). Some of the Fund’s largest investments also contributed most to our relative underperformance during the period – including Apple (AAPL), Facebook (FB) and Salesforce.com (CRM). New or significant additions to the portfolio during the first half included Cabela’s (CAB) and Regeneron Pharmaceuticals (REGN).

As always, we thank you for your confidence and continued investment in the Berkshire Focus Fund.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2013 (UNAUDITED)

1. Organization

The Berkshire Focus Fund (the “Fund”) is a non-diversified series of The Berkshire Funds (the “Trust”), an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Trust was organized as a Delaware business trust on November 25, 1996. The Fund commenced operations on July 1, 1997. The Fund’s investment objective is to seek long-term growth of capital primarily through investments in equity securities.

2. Significant Accounting Policies

The following is a summary of the Trust’s significant accounting policies:

Securities valuation — The Fund’s portfolio securities are valued as of the close of the regular session of trading on the New York Stock Exchange (the “NYSE”), normally 4:00 p.m., Eastern time. Securities which are traded on stock exchanges or are quoted by Nasdaq are valued at the last reported sale price as of the close of the regular session of trading on the NYSE, or, if not traded, at the most recent bid price. Securities which are traded in the over-the-counter market, and which are not quoted by Nasdaq, are valued at the most recent bid price, as obtained from one or more of the major market makers for such securities. Securities for which market quotations are not readily available are valued at their fair value as determined in good faith in accordance with consistently applied procedures established by and under the general supervision of the Board of Trustees.

The Trust has adopted accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy is organized into three levels based upon the assumptions (referred to as “inputs”) used in pricing the asset or liability. These standards state that “observable inputs” reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from independent sources and “unobservable inputs” reflect an entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability. These inputs are summarized in the three broad levels listed below:

Level 1 – quoted prices in active markets for identical investments.

Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments).

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2013 (UNAUDITED)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of June 30, 2013:

There were no transfers into or out of Level 1, Level 2 or Level 3 fair value measurements during the reporting period, as compared to their classification from the most recent annual report. It is the Fund's policy to consider transfers into or out of Level 1, Level 2 or Level 3 as of the end of the reporting period. The Fund did not hold any derivative instruments during the reporting period.

Investment income — Dividend income is recorded on the ex-dividend date. Interest income is accrued as earned.

Distributions to shareholders — Distributions to shareholders arising from net investment income and net realized capital gains, if any, are distributed at least once each year. Distributions to shareholders are recorded on the ex-dividend date. Dividends from net investment income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP.

Security transactions — Security transactions are accounted for on the trade date. Securities sold are determined on a specific identification basis.

Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

■

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2013 (UNAUDITED)

Federal income tax — The Fund intends to comply with the requirements of Subchapter M of the Internal Revenue Code (the “Code”) necessary to qualify as a regulated investment company. As provided therein, in any fiscal year in which the Fund so qualifies and distributes at least 90% of its taxable net income, the Fund (but not the shareholders) will be relieved of federal income tax on the income distributed. Accordingly, no provision for income taxes has been made.

As of and during the year ended December 31, 2012, the Fund did not have a liability for any unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as other expense on the statement of operations. During the year, the Fund did not incur any tax-related interest or penalties. The Fund is not subject to examination by U.S. federal tax authorities for tax years before 2009.

In order to avoid imposition of the excise tax applicable to regulated investment companies, it is also the Fund’s intention to declare as dividends in each calendar year at least 98% of its net investment income and 98.2% of its net realized capital gains plus undistributed amounts from prior years.

Other — The treatment for financial reporting purposes of distributions made to shareholders during the year from net investment income or net realized capital gains may differ from their ultimate treatment for federal income tax purposes. These differences are caused primarily by differences in the timing of the recognition of certain components of income, expense or realized capital gain for federal income tax purposes. Where such differences are permanent in nature, they are reclassified in the components of the net assets based on their ultimate characterization for federal income tax purposes. Any such reclassifications will have no effect on net assets, results of operations or net asset value per share of the Fund.

3. Investment Transactions

Purchases and sales of investment securities (excluding short-term instruments) for the six months ended June 30, 2013 were \$112,935,383 and \$126,866,287, respectively. There were no purchases or sales of U.S. Government securities for the Fund.

4. Tax Information

As of December 31, 2012, the components of accumulated earnings (deficit) on a tax basis were as follows:

Federal income tax cost	\$ 54,141,228
Gross unrealized appreciation	\$ 2,644,417
Gross unrealized depreciation	(3,715,965)
Net unrealized depreciation	(1,071,548)
Undistributed ordinary income	-
Accumulated losses	(2,291,935)
Total accumulated losses	\$ (3,363,483)

■

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2013 (UNAUDITED)

The cost basis of investments for tax and financial reporting purposes differs primarily due to the deferral of capital losses from wash sales.

There were no distributions paid during the six months ended June 30, 2013 or the year ended December 31, 2012.

Under the Regulated Investment Company Modernization Act of 2010, the Fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

At December 31, 2012, the Fund had accumulated net realized capital loss carryforwards of \$2,291,935 which will expire on December 31, 2016. There were no short-term capital loss carryforwards with an indefinite expiration. To the extent these loss carryforwards are used to offset future capital gains, it is probable that the amount, which is offset, will not be distributed to shareholders. During the year ended December 31, 2012, the Fund utilized \$4,204,085 of its outstanding capital loss carryforward.

5. Related Party Transactions, Investment Advisory and Administrative Fees

Certain Officers and Trustees of the Trust are also Officers and Directors of Berkshire Capital Holdings, Inc. ("Berkshire Capital"). The non-interested Trustees of the Fund were paid \$5,000 in Trustee fees and expenses directly by Berkshire Capital during the six months ended June 30, 2013.

The Fund has an Investment Advisory Agreement (the "Advisory Agreement") and a separate Administration Agreement with Berkshire Capital. Under the Advisory Agreement, Berkshire Capital will determine what securities will be purchased, retained or sold by the Fund on the basis of a continuous review of the portfolio. For the services it provides under the Advisory Agreement, Berkshire Capital receives a fee accrued each calendar day (including weekends and holidays) at a rate of 1.50% per annum of the daily net assets of the Fund. Under the Administration Agreement, Berkshire Capital renders all administrative and supervisory services of the Fund, as well as facilities furnished and expenses assumed. For these services, Berkshire Capital receives a fee at the annual rate of 0.50% of the Fund's average daily net assets up to \$50 million, 0.45% of average net assets from \$50 million to \$200 million, 0.40% of average net assets from \$200 million to \$500 million, 0.35% of average net assets from \$500 million to \$1 billion and 0.30% of average net assets in excess of \$1 billion. Such fee is computed as a percentage of the Fund's daily net assets and is accrued each calendar day (including weekends and holidays). For the six months ended June 30, 2013, Berkshire Capital was paid an investment advisory fee of \$369,806 and an administration fee of \$122,941 from the Fund. The amount due to Berkshire Capital for these fees at June 30, 2013 totaled \$74,905.

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2013 (UNAUDITED)

6. Redemption Fee

The Fund may impose a redemption fee of 2.00% on shares held for 90 days or less. For the six months ended June 30, 2013, proceeds from redemption fees were \$19,426.

7. Beneficial Ownership

The beneficial ownership, either directly or indirectly, of more than 25% of the voting securities of a fund creates a presumption of control of the Fund, under Section 2(a)(9) of the Investment Company Act of 1940. At June 30, 2013, National Financial Services Corp. and Charles Schwab & Co. beneficially owned, in aggregate, 38.87% and 26.43% of the Fund, respectively.

8. Subsequent Events

In preparing these financial statements, management has performed an evaluation of subsequent events after June 30, 2013 and determined that there were no significant subsequent events that would require adjustment to or additional disclosure in the financial statements.

EXPENSE EXAMPLE

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including advisory fees, administrative fees and interest expense. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested in the Fund on January 1, 2013 and held through June 30, 2013.

Actual Expenses

The first line of the table on the following page provides information about actual account values and actual expenses. Although the Fund charges no sales load or transaction fees, you will be assessed fees for outgoing wire transfers, returned checks and stop payment orders at prevailing rates charged by Mutual Shareholder Services, LLC, the Fund's transfer agent. If you request that a redemption be made by wire transfer, currently a \$20.00 fee is charged by the Fund's transfer agent. IRA accounts will be charged an \$8.00 annual maintenance fee. To the extent the Fund invests in shares of other investment companies as part of its investment strategy, you will indirectly bear your proportionate share of any fees and expenses charged by the underlying funds in which the Fund invests in addition to the expenses of the Fund. Actual expenses of the underlying funds are expected to vary among the various underlying funds. These expenses are not included in the example. The example includes advisory fees, administrative fees and interest expense. However, the example does not include portfolio trading commissions and related expenses and other extraordinary expenses as determined under generally accepted accounting principles. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5%

hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	Beginning Account Value <u>January 1, 2013</u>	Ending Account Value <u>June 30, 2013</u>	Expenses Paid During the Period* January 1, 2013 to <u>June 30, 2013</u>
Actual	\$1,000.00	\$1,055.50	\$10.24
Hypothetical (5% annual return before expenses)	\$1,000.00	\$1,014.83	\$10.04

*Expenses are equal to the Fund's annualized expense ratio of 2.01%, multiplied by the average account value over the period, multiplied by 181/365 to reflect the one-half year period.
